Sona Sargsyan

(747)-609-6530 | Burbank, California | github.com/sona-sar | linkedin.com/in/sona-sar

EDUCATION

Loyola Marymount University — Los Angeles, CA
Bachelor of Science in Computer Science, Minor in Game Design — *Aug. 2024 - May 2026*

Glendale Community College — Glendale, CA
Associate of Science in Computer Science — *Aug. 2022 - Jun. 2024*

TUMO Center for Creative Technologies — Yerevan, Armenia
Certificate in Studio Arts — *Sep. 2017 - Sep. 2019*

PROFESSIONAL EXPERIENCE

Snap Inc. — May 2026 - Present
Software Engineer
- Develop iOS features for Snap's Ad Client team, contributing to high-impact projects that support Snap's advertising platform and collaborating with engineers to design, implement, and ship features.
- Identify and resolve iOS bugs through debugging, QA testing, and cross-functional test sessions, helping maintain the reliability and stability of Snap's advertising products.

Loyola Marymount University — Sep. 2025 - May 2026
Teaching Assistant
- Deliver individualized support to students in Game Design and Introductory Python courses, strengthening technical skills.
- Evaluate and provide feedback on assignments and projects, diagnosing IDE issues and guiding students through solution implementation..

Snap Inc. — May 2025 - Aug. 2025
Software Engineer Intern
- Built a Python-based debugging tool to help backend engineers diagnose issues in the Ad Delivery system.
- Automated the visualization of decision flows and dependencies to streamline troubleshooting.
- Built a Next.js site to visualize dependencies in an interactive tree, enabling network requests and ad response simulations.

Mathnasium Learning Center — Sep. 2022 - May 2024
Math Instructor
- Mentored students ages 5-17 in math, simplifying complex concepts and improving test scores.
- Developed innovative strategies for managing kids who struggled with learning disabilities.
- Created a supportive and engaging learning environment, encouraging students to build confidence in their math abilities.

PROJECTS

Good Find | *TypeScript, JavaScript, React Native, Clerk, Convex,*
- Co-developed a cross-platform mobile application for a real-time crowdsourced food resource map in Los Angeles, winning 1st place at "LMU Hacks 2026" within a 24-hour build cycle.
- Architected a full-stack community platform featuring live map pin creation, deal scheduling, user reputation/badge systems, and content moderation - seeded with real LA food bank and pantry data at launch.

Boxy Beasts | *C#, Unity, MagicaVoxel*
- Developed a 3D voxel-style Sokoban puzzle game, implementing grid-based movement, box-pushing mechanics, collision handling, and progressively challenging level design.
- Designed and integrated custom voxel environments and puzzle layouts in MagicaVoxel, creating a cohesive visual style while emphasizing clear reasoning and gameplay flow.

Arastagh.am | *React, JavaScript, Node.js, Express.js, Leaflet API, MUI*
- Developed a responsive, category-driven web platform, structuring reusable UI components to improve navigation and content discovery.
- Built a Node.js/Express.js backend with Telegram integration and Leaflet API functionality, enabling Telegram-based communication and interactive location-based features.

SKILLS

Languages: TypeScript, JavaScript, Python, Swift, Objective C, Java, C++, C#
Frameworks/Tools: React.js, Next.js, React Native, Node.js, Express.js, Three.js, Clerk, Convex, Supabase, Unity, Godot, Figma

HACKATHONS

Google DeepMind x **UCLA Glitch** – Runner-Up | Hackathon | Plated.ai — Mar. 2026
LMU Hacks 2026 – 1st Prize Winner | Hackathon | GoodFind — Mar. 2026
